

Stream No. 4 cont'd

Aug. 7, 1924: 20,000 fish

Sept. 18, 1926: 7,000 humps, 65 silvers, and 18 reds.

1927: No visit. Allowed 15,000 fish.

Stream No. 5 (1 notice)

Head west arm, Paddy Bay.

Width: 12 feet

Depth: 5 inches.

Has a rough rock bottom for 150 feet, then about 1,500 feet of fine gravel bottom with a lot of wide places from 15 to 20 feet wide and from 3 to 5 inches deep. It forms two ponds near mouth.

Aug. 9, 1924: 6,000 fish. (Two small seine boats hung around this bay a good deal)

Aug. 8, 1925: 6,000 fish.

Aug. 6, 1926: 1,000 fish.

Aug. 25, 1927: 1,600 fish.

Stream No. 6 (1 notice)

Head east arm, Paddy Bay.

Two streams,-- enough water for 20 feet wide and 5 inches deep.

Has a rough gravel bottom finer out from mouth. Bay shallow long way out. Not many fish in stream. Water low. Stream short.

Aug. 5, 1926: 1,500 fish

Aug. 25, 1927: 4,000 fish,--50 silvers.

Stream No. 7 (2 notices)

Eshamy lagoon and lake.

Stream is hard to measure. Has a rough boulder bottom and swift, but has water enough for 12 feet wide and 12 inches deep. Is about 1/4 mile long.

Sept. 8 & 9, 1925: 1,850 reds (alive and dead) and 100 silvers counted from skiff on spawning ground.

Sept. 15, 1926: 3,349 reds (alive and dead--only 146 dead) and 150 silvers. The small hump streams entering the lagoon and Gumboot would have about 10,000 humps.

Sept. 22, 1927: 1,864 reds in lake, and 43,500 humps in the two lagoons and the lake stream.
